MADE IN THE U.S.A.

Modular Magazine Well

The modular magazine well allows the use of STANAG magazines commonly used in the M16 and M4 platforms to be used in the MGA SAW™ and MGA SAW K™. It is attached to the receiver with 2 hex nuts, and can be removed and replaced with a plate to prevent debris from entering the receiver.

By adding a magazine well to a squad support weapon, the gunner is now able to use commonly available magazines in emergency situations when belted ammunition is not available.

SPECIFICATIONS:

Part No.- MGA8212
Platform Compatibility- MGA SAW™, MGA SAW-K™
Caliber- 5.56x45mm, 300 AAC BLK
Material- 7075 aircraft aluminum
Finish- Type 3 hard anodizing (black)
